 IDENTIFIERS *Washington

ABSTRACT

In order to reveal trends in community college enrollments in Washington, student demographic and enrollment data for academic year 1978-79 were compiled and compared with figures for previous years. The study report provides annualized averages for full-time equivalent (FTE) enrollments for the years 1968-69 to 1978-79 and quarterly and annualized student enrollments by institutional intent (i.e., academic, occupational, or community service) for the same period. Quarterly enrollments are summarized systemwide and by district. Student characteristics that were focused upon in the study include age, sex, ethnic background, previous year's activities, veteran and residency status, credit-hour load, enrollment category, and headcount and FTE enrollments by time and location. Study findings for 1978-79 include the following: (1) 52.4% of the students were enrolled in an academic category, 46.2% in an occupational category, and 1.4% in a community services category; (2) of the 180,922 students enrolled, 22% were less than 21 years old; (3) female enrollments exceeded male enrollments by 10% (55% vs. 45%); (4) 4.34% of the students were from out of the state; (5) veteran enrollments dropped from 14% in 1975 to 6.51% in 1978; (6) 75.3% of the students were Caucasians; (7) 65% of the students were enrolled on a part-time basis; and (8) fall quarter FTE's increased by more than 463% between 1962 and 1978. F O R E W O R D

The FACTBOOK, ADDENDUM A: STUDENT ENROLLMENTS, displays detailed student enrollment data for Academic Year 1978-79. This is the third edition of Addendum A. The first and second editions summarized Academic Years 1976-77 and 1977-78 enrollments respectively.

Addendum A expands Chapter 2 of the FACTBOOK (which emphasizes system-wide enrollments) by displaying district information to address trends at individual institutions.

The first section of this report concerns student enrollments and has been divided into two sub-sections: annualized averages and detailed quarterly enrollments.

The second section reviews student characteristics for fall quarters. (Demographic information is collected fall quarters only and applies to academic and occupational students.)

Information for this publication has been obtained from two of the Management Information System (MIS) files: the MIS-1 Student Enrollment Report and the MIS-2 Course Effort Report. Additional information on the state system of community colleges may be obtained from the State Board for Community College Education, 319 East Seventh Avenue, Mail Stop FF-11, Olympia, WA 98504; telephone: (206) 753-3673 or SCAN 234-3673. Comments on the contents and format of this publication would be greatly appreciated.

I N T R O D U C T I O N

This publication reviews student enrollment patterns and the types of students served by the community college system, a unique segment of Washington postsecondary education.

Enrollment data has been taken from the State Board's MIS-1 (Student Enrollment Report) and MIS-2 (Course Effort Report). Demographic information is collected for fall quarters and applies only to academic and occupational students.

The terms "academic", "occupational", and "community service" students used in tables in this chapter are "institutional intent" categories; i.e., the institution's intent for offering courses. Headcount and FTE enrollments are categorized by institutional intent. These categories should not be confused with "student intent" data -- the student's reason for attending college. Student intent definitions may be found on page 34.

When comparing community college enrollment patterns, it is important to understand the counting methodologies involved. Historical enrollments have been based on an "8th day plus adds" counting methodology in which the number of students enrolled on the 8th instructional day of a quarter were counted and all registrations for the rest of the quarter were added. As a result of discussions with the Legislature, a "rolling 10th day" counting methodology means that courses must be identified as either continuous¹ or sequential². Based on this course type, 10th day enrollments are derived in the following manner:

¹Continuous instruction course sections are of the open entry/open exit type which permit a student to enroll, begin and end instruction at any time.

²Sequential instruction course sections are any courses not classified as continuous.

- (1) Enrollments in sequential course sections which begin during the first five days of instruction of a regular quarter are counted on the 10th day of that quarter on a net basis (neither adds nor withdrawals after the 10th day have any effect);
- (2) enrollments in sequential course sections which begin after the 5th instructional day are counted on the 10th quarterly instructional day after the start of a course on a net basis; and,
- (3) enrollments in all other courses such as short courses, seminars and continuous enrollment offerings are counted on a net basis at the end of the quarter in which fees are collected.

The basic difference between the two systems of counting is that the 8th-day method captured the net 8th-day headcount plus all official registration adds during the remainder of the quarter. The rolling 10th-day method does not include an adds that occur after the 10th instructional day in any sequential course.

Since FTE student data is a major component in the budgeting process of the system and historical enrollment is used in budget development, an agreement with the Legislature provided for the collection of enrollment according to the new counting methodology in the 1975-77 biennium to provide a base for the 1977-79 allocations. Thus, a dual reporting system was developed for the 1975-76 and 1976-77 academic years. In 1975-76, enrollments were based on the 8th-day counting methodology, and supplemental records identifying the 10th-day enrollments were provided. For the 1976-77 academic year, enrollments were based on the 10th-day counting methodology with supplemental records identifying the 8th-day enrollments. The 1977-78 academic year and all subsequent academic years will be based solely on the 10th-day counting methodology.

The enrollment tables on the following pages illustrate both enrollment counting figures for 1975-76 and 1976-77; 1977-78 and 1978-79 figures are based on the rolling 10th-day method. Demographic data was based exclusively on 8th-day enrollments for 1971 through 1975; 1976 through 1978 information was based on 10th-day enrollments.

STUDENT ENROLLMENTS

ANNUALIZED FTE STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES
ACADEMIC YEAR 1968-69 THRU 1978-79

Annualized state-supported FTE enrollments play a key part in the budgeting and planning process for the community college system. The primary workload variable for the community college budget model is the annualized average FTE. The system is held accountable for its performance against the appropriated levels, and operating budget allocations to college districts are based in part on their FTE allocations.

Annualized FTE student enrollments are derived by adding the student credit hours generated for each of the four quarter and dividing by a factor of 45 (1 FTE = 15 credit hours per quarter, 1 times three quarters = 45).

Figure 1-1 illustrates the spread between academic, occupational and community service courses by total FTEs.

Table 1-1, page 3, displays system total annualized FTEs by source of funds since 1968-69.

SUMMER QUARTER STUDENT ENROLLMENTS WASHINGTON COMMUNITY COLLEGES 1968 THRU 1978

FIGURE 1-2: SUMMER STUDENT ENROLLMENTS

Summer quarters are included in the community college operating appropriations. The annualized FTEs include FTEs generated during all four quarters of an academic year.

Figure 2-2 shows the percentage distribution of academic, occupational, and community service FTEs since 1968.

Table 1-15 displays system FTEs and total enrollment (headcount) by institutional intent since 1968. District detail by institutional intent and funding source for Summer Quarter 1978 may be found in Table 1-16.

FALL QUARTER STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES

1968 THRU 1978

The focal point for community college data is fall quarter, typically the term most reflective of college activities throughout an academic year. All student demographic information is based on fall quarter enrollments.

Figure 1-3 displays the percentage distribution of academic, occupational and community service FTE-student enrollments since 1968.

Table 1-17 on the following page shows the systemwide FTE and headcount enrollments by institutional intent for fall quarters since 1968. Table 1-18, page 22, displays district detail for student enrollment for Fall Quarter 1978. In addition, Tables 1-19 and 1-20 and Figures 1-4 and 1-5 display district detail for student headcount and FTE enrollments, respectively, since 1968 (pages 22-26).

FALL QUARTER STUDENT HEADCOUNT WASHINGTON COMMUNITY COLLEGES 1968 THRU 1978

Figure 1-4 illustrates the rapid growth of community college enrollments. Headcount enrollment has increased by more than 584 percent since 1962. The sharp increase in 1977 and 1978 resulted from the surge of women into higher education. The decline from 1975 to 1976 (4,822 students, or 3 percent) was due in part to the reduction in veteran enrollments attributed to new federal restrictions and to an improvement in the job market (community college enrollment tends to decrease when employment increases). Also contributing to the decline was a change in counting enrollments (see the Introduction, page iv for a discussion of enrollment counting methodologies). Table 1-19 on the following page displays detailed district headcount enrollments since 1968.

FULL-TIME-EQUIVALENT STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1968 THRU 1978

Another mean for reporting student enrollments is the full-time-equivalent (FTE) measure. FTE student enrollments are derived by adding the total number of credit hours generated by students and dividing by 15 (15 credit hours are considered a typical full-time student load for one quarter).

Fall quarter FTE enrollments have increased by more than 463 percent since 1962. The only decline in the upward trend occurred in 1976. This decline was due to the change in counting enrollments, the improvement of the job market, and the reduction of veteran enrollments.

Headcount enrollment has grown at a faster rate than FTE enrollment, indicating a growing proportion of part-time students in attendance. This was particularly prominent during Fall Quarters 1977 and 1978. The student demographic section of this report, which discusses historical student credit-hour loads, graphically portrays this trend. Figure 1-6 illustrates the growth rate for headcount and FTE enrollments since 1968.

SOURCE: SBCCE MIS-1 Student Enrollment Reports and MIS-2 Course Effort Reports.

NOTE: *Seattle North, Seattle South, and Spokane Falls were established in 1970; however, data was incorporated with Seattle Central and Spokane Community Colleges respectively for that year.

The sum of the detail may not equal the system totals in all instances due to rounding of credit hours. Figures include academic, occupational and community service students; all funding sources are reflected. Eighth-day plus adds counting methodology, 1968-75; rolling tenth-day counting methodology, 1976 through 1978.

**The cumulative percent change is calculated from base year 1962 (15,739 FTEs).

WINTER QUARTER STUDENT ENROLLMENTS

WASHINGTON COMMUNITY COLLEGES
1969 THRU 1979

Figure 1-7 displays the percentage distribution of academic, occupational and community service FTE enrollments during Winter Quarters since 1969.

Winter Quarter FTE enrollments have more than doubled since 1969 (from 42,080 to 85,361 FTEs, or 203 percent. During academic year 1974-75, systemwide Winter Quarter enrollments exceeded those of Fall Quarter (81,123 FTEs compared to 80,203 FTEs respectively). This trend did not continue in subsequent academic years.

STUDENT CHARACTERISTICS

STUDENT DEMOGRAPHIC CHARACTERISTICS

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1974 THRU 1978

The remainder of this report is devoted to community college student characteristics. Information on the age, sex, ethnic background, residency status, veteran status, credit-hour loads and the sources of students has been provided for academic and occupational students. Tables on the following pages display system totals since 1974 and district detail for Fall Quarter 1978. Demographic information has been further classified by student intent.

The term "academic and occupational" students used in this section are "institutional intent" categories, i.e., the institution's classification of courses in which students are enrolled. Headcount and FTE enrollments are categorized by institutional intent. These categories should not be confused with "student intent" data.

Student intent is the student's declared purpose for attending college. Student intent categories are displayed on the opposite table.

Student intent categories are determined during the admission process and updated or clarified during each quarter's registration. Ideally, selection of an enrollment category is the end result of an interview

TABLE 2-1: STUDENT INTENT CATEGORIES

- (1) General Studies (Degree or Certificate): The student is or appears to be enrolled primarily for the purpose of completing a certificate or up to two years of study which may qualify for an associate degree, but without either a specific occupational or college-transfer objective.
- (2) Academic Transfer: The student is or appears to be enrolled primarily with the intent of transferring earned credits for advanced study in upper division programs of four-year institutions.
- (3) Adult Basic Education: Enrolled primarily for the purpose of completing an 8th-grade education.
- (4) High School Diploma/GED Certificate: Enrolled primarily for the purpose of completing a high school diploma or General Education Development certificate, either through the community college or some cooperating secondary school.
- (5) Developmental: Enrolled primarily for the purpose of attaining or reviewing basic skills of a remedial nature.
- (6) Occupational Preparatory: Officially enrolled in an approved vocational program intended to provide entry-level occupational skills.
- (7) Occupational Preparatory, Applicant: The student has or appears to have the intent of enrolling in an approved occupational program, but is not officially recognized by the institution as being admitted to the program.
- (8) Occupational Apprenticeship: The student is officially enrolled in occupational apprenticeship program courses that supplement or are related to regular work experience received on-the-job, and is registered with the Washington State Apprenticeship and Training Council and/or the Federal Bureau of Apprenticeship Training.
- (9) Occupational Supplemental: The student is or appears to be enrolled primarily to augment existing job skills.
- (10) Occupational Home and Family Life: Enrolled primarily to augment home or family-life skills.
- (11) General Studies (Non-Degree/Non-Certificate): The student is or appears to be enrolled for "personal enrichment" or to explore educational opportunities.
- (12) Undecided: The student has specifically stated that he cannot declare a specific objective or long-range goal associated with his enrollment at the time, and none of the above categories apply.
- (13) Other/Not Indicated: The student did not select a category, and the institution did not assign one.

with each student. This is not possible in every case, and when it is not, the staff of the college uses its best judgment on how to assign a category.

The source of students entering the community college system is frequently used by the Council for Post-secondary Education in its report on student mobility among the various elements of education. It is also used in the planning and budgeting process. Student source categories are classified into six areas, as shown in the opposite table.

Student credit-hour loads are discussed on page 55. Part-time students are defined for fee collection purposes as those enrolled for less than 10 credit hours per quarter; full-time students are defined as taking 10 or more credits per quarter.

TABLE 2-2: SOURCE CATEGORIES

- (1) Transfers: All students who are transferring college-level credits from some other institution and who were registered for one credit the previous fall term at some other institution. This category has been further defined to gather data on those students entering the community college system from four-year public and private universities, out-of-state colleges and universities, and intra-segment transfers.
- (2) Retained: Students who were enrolled in the same institution the previous fall term.
- (3) Military: Students who were in the military service during the previous academic year.
- (4) High School: Students who graduated from a high school in the State of Washington during the preceding academic year. The county of high school previously attended is collected.
- (5) Out-of-State: Students whose residence during the previous fall quarter was outside the State of Washington, and who were not registered for credit at any institution of higher education outside the State of Washington.
- (6) All Others: Students not elsewhere classified and located in the State of Washington during the previous fall term, e.g., housewives, those previously employed, and veterans.

NOTE: Student demographic data is collected during fall quarter only and covers academic and occupational students (community service students are excluded).

STUDENT HEADCOUNT BY AGE

WASHINGTON COMMUNITY COLLEGES

FALL QUARTERS 1974 THRU 1978

The average age of community college students is 29.5. Currently, of all students indicating their age, 76 percent are 21 years or older; more than half of this same category are 30 years old or older.

A comparison between student age categories and student intent categories (Ref. Table 2-6) indicates that the majority of students 19 years old and younger are attending community colleges for the purpose of academic transfer. Students between the ages of 20 and 29 are heavily clustered in the academic transfer, occupational preparatory and supplemental categories; the majority of students between the ages of 30 and 59 are attending for occupational supplemental purposes.

Table 2-5 on page 38 displays age distributions for each college. Table 2-6 on page 39 displays student headcount by age and student intent categories.

FIGURE 2-1: AGE DISTRIBUTION

STUDENT HEADCOUNT BY SEX

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1974 THRU 1978

As shown in Figure 2-2 and Table 2-7, female enrollment now exceeds male enrollment. In 1974 female enrollment accounted for 49 percent of the student population. In 1978, female enrollment exceeded that of males by 10 percent (female, 54 percent; male, 44 percent). The declining veteran enrollment during 1976 through 1978 contributed to the decline of male enrollment.

When a comparison was made between the age and sex of students, it was found that between the ages of 19 and 23, men accounted for more than 50 percent of each age category. In the 18 and younger and 24 and over categories, women outnumbered the men. The decline in veteran enrollment probably accounts for these variations.

Table 2-8, page 41, displays the sex distribution for each college. Table 2-9, page 42, shows student headcount by sex categories and student intent.

STUDENT HEADCOUNT BY SOURCE

WASHINGTON COMMUNITY COLLEGES FALL QUARTERS 1974 THRU 1978

Prior to Fall Quarter 1977, source data was gathered by asking students where they were the previous Fall Quarter. This information (the date on which a student last attended high school or an institution of higher education) is now captured directly from the admission records and is considered more reliable.

The greatest percentage (67 percent) of students entering community colleges fall under the category of "all others". Washington residents other than those entering directly from high school or immediately transferring from another Washington institution are counted in this category. Since this is the area in which veterans are classified, this category suffered the greatest decline between 1975 and 1976 (93,015 students to 85,433, respectively).

Table 2-11 on page 44 displays student headcount by source and college. Table 2-12, page 45, shows student headcount by source and student intent categories.

Table 2-10: Student Headcount by Source
was removed due to irreproducibility.

*NOTES: Includes students transferring from one Washington community college to another, from Washington public regional colleges and The Evergreen State College, from Washington 4-year private colleges, and from out-of-state institutions of higher education, respectively.

STUDENT HEADCOUNT BY ETHNIC BACKGROUND

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1974 THRU 1978

The number of minorities attending community colleges is nearly 9 percent of the total student population. Compared to 1977, minority enrollment for Asians, Blacks, American Indians, and Chicano/Mexican Americans remained constant. The "other minority" category declined from 6,299 in 1976 to 2,646 in 1977. Refined data collection procedures account for most of the difference and also affected the accuracy of the foreign student data. Prior to 1977, not all foreign students (those with F and J visas) were counted under this category. Rather, they were included under their individual minority classifications.

The greatest minority population is located in the Seattle area. Yakima Valley, Olympic, Tacoma and Fort Steilacoom also have relatively large minority enrollments.

Most minority students are enrolled in academic transfer, occupational preparatory and occupational supplemental areas.

Table 2-14, page 47, shows student headcount by ethnic background and college; Table 2-15, page 48, displays student headcount by ethnic background and student intent.

Table 2-13: Student Headcount by Ethnic Background was removed due to irreproducibility.

STUDENT HEADCOUNT BY VETERANS STATUS

WASHINGTON COMMUNITY COLLEGE
FALL QUARTERS 1974 THRU 1978

The recent decline in veteran students attributable to new federal restrictions affecting G.I. Bill educational benefits is considered the greatest single factor affecting community college enrollments during the years 1976 through 1978.

The decline between 1975 and 1976 (7,752 students) is much greater than the decline between 1976 and 1977 (803 students). This difference is probably due to the initial impact of the government's new policy.

Table 2-17, page 50, displays student headcount by veterans status and college; Table 2-18, page 51, shows student headcount by veterans status and student intent.

STUDENT HEADCOUNT BY RESIDENCY FEE STATUS

WASHINGTON COMMUNITY COLLEGE
FALL QUARTERS 1974 THRU 1978

The percentage of non-resident students is relatively small (4.3 percent or 7,387 students in 1978). The non-resident student population consistently increased between 1974 and 1976, and showed only a minimal decrease (51 students) between 1976 and 1977. In 1978, this segment of the student population increased by more than 2,000 students over that of 1977.

Non-resident students are heavily clustered in the Seattle Central area, in the Yakima Valley area, and in colleges which are close to the state's borders--Walla Walla, Lower Columbia, Clark and Spokane.

Non-resident students are primarily enrolled for purposes of academic transfer, general studies, occupational supplemental, and occupational supplemental.

Table 2-20, page 53, displays student headcount by residency status and college. Table 2-21 shows student headcount by residency status and student intent.

STUDENT HEADCOUNT BY CREDIT-HOUR LOAD

WASHINGTON COMMUNITY COLLEGE
FALL QUARTERS 1974 THRU 1978

The number of part-time students rose to 65 percent of total enrollments in Fall Quarter 1978. The average credit-hour load fell from 8.1 in 1977 to 7.7 in 1978. Since most veterans are full-time students, the decrease in their enrollments contributed to the decline.

Part-time students are defined for fee collection purposes as those enrolled for less than 10 credits. Full-time-equivalents are hypothetical students taking 15 credits per quarter (a full-time student typically takes 45 credits per academic year).

The majority of part-time students are enrolled in the occupational supplemental and general studies (non-degree) areas. Full-time students are primarily enrolled in the occupational preparatory and academic transfer areas.

Table 2-23, page 55, displays student headcount by credit-hour load and college. Table 2-24, page 56, shows student headcount by credit-hour load and student intent.

Table 2-22: Student Headcount by Credit-Hour Load was removed due to irreproducibility.

STUDENT HEADCOUNT BY STUDENT INTENT

WASHINGTON COMMUNITY COLLEGE
FALL QUARTERS 1974 THRU 1978

Tables 2-26 through 2-28 illustrate the composition of student body, other than those enrolled in community service courses, on the basis of their educational objectives--the student's intent for attending a community college Table 2-28, page 61, displays system data by student intent categories for headcount and FTE enrollments, average credit-hour loads, the percentage of headcount enrollment attending day-on-campus courses, percent males, average age, percent minority, and percent of veterans.

Occupational preparatory students represent the largest share of FTE enrollments and generate the most credit hours (nearly 1/3 of total). Males dominate enrollments in the apprentice and academic categories; females, however, constitute the majority systemwide. Veterans are heavily clustered in the general studies (degree/certificate), academic transfer, and occupational preparatory fields. The highest average age is in the general studies (non-degree/ non-certificate) area which is offered predominantly during evening hours.

STUDENT HEADCOUNT BY TIME/LOCATION AND AGE

ACADEMIC AND OCCUPATIONAL STUDENTS ONLY WASHINGTON COMMUNITY COLLEGE FALL QUARTERS 1974 THRU 1978

The number of students attending day-on-campus courses compared to all other times and locations (evening on-campus, day and evening off-campus) is displayed in Table 2-29.

Day-on campus activity is the primary workload indicator that is used in the Capital Analysis Model (CAM) process to generate space allowances and is also a good indicator of the enrollment demand for full-time faculty.

Currently, 41 percent of total academic and occupational students attend day-on-campus courses. In 1974, nearly 44 percent attended during the day and on-campus.

Table 2-30, page 65, displays student headcount by time/location and college; Table 2-31, page 64, shows student headcount by time/location and student intent.

S U M M A R Y O F S T U D E N T C H A R A C T E R I S T I C S

Washington Community colleges enrolled more than 180,000 students during Fall Quarter 1978. In terms of full-time-equivalents, enrollment was more than 88,500.

In 1977-78 total annualized average FTEs were 89,768. Out of this, state-supported annualized average FTEs accounted for 85,666; the balance --4,102 FTEs--represented contracted and community service efforts.

Currently, of all students indicating their age, 76 percent are 21 years or older; more than half of these students are 30 years old or older.

Female enrollment exceeds male enrollment. In 1971, female enrollment accounted for 43 percent of the student population. In 1978, female enrollment exceeded that of males by nearly 10 percent (female, 54 percent; male, 44 percent). The number of minority students attending community colleges during Fall Quarter 1978 was over 15,000, about 9 percent of total enrollment.

The number of non-resident students attending Washington community colleges in Fall 1978 was 7,387 (4.34 percent of total). In 1971, 2,833 non-resident students attended (2.71 percent of total).

The number of veterans attending is currently 11,081 (6.51 percent of total). In 1975, veterans accounted for 14 percent of the total (18,705 students). The decline, attributable to new federal restrictions affecting G.I. Bill educational benefits, is considered the greatest single factor affecting community college enrollments during the years 1976 and 1977.

The greatest percentage (67 percent) of students entering community colleges fall under the category of "all others." Washington residents other than those entering directly from high school or immediately transferring from another Washington institution of higher education are counted in this category. More than 39,000 students (23.40 percent of total) returned to the same community college this year.

The number of part-time students rose to 65 percent of total enrollments during Fall Quarter 1978, which reduced the average credit-hour load from 8.5 in 1976 to 7.7 in 1978.

More than 40 percent of total academic and occupational students attended courses during the day and on-campus, compared with nearly 44 percent in 1974.
